

MIRROU — AI-Prompt-Blueprints

Status: Generative Workflow-Spezifikation
Owner: Olha Yevtushenko / Creative Layer
Gültigkeit: Exklusiv für Mirrou-interne Exploration und finalen Asset-Bau

Trennungsprinzip

Kategorie	Verwendung	Final-Ready?
Moodboard / Exploration	Interne Richtungsfindung, Pitch-Vorbereitung, Kundenpräsentation	Nein —immer als “Konzept” labeln
Final-Production	Direkte Verwendung in Website, Kampagnen, Press	Ja —nur nach Olha-Review und AI-Ausweisung

Blueprint 1: Abstract Backdrop (Moodboard & Final)

Zweck: Atmosphärische Hintergründe für Website-Sections, Paid-Social-Backgrounds, Editorial-Layouts.

Eingabefelder:

Feld	Beschreibung	Standard-Wert
Mood	Emotionale Qualität	“Cinematic, restrained, premium”
Licht	Lichtlogik	“Single directional gold light source, deep shadows, lifted blacks”
Kamera	Optische Qualität	“50mm lens, f/1.4, shallow depth of field, subtle chromatic aberration”
Farbwelt	Palette	“Deep black #0A0A0A, warm gold #C6A56B, cool blue undertones #7D8087, ivory highlights #F5F3EE”
Key-Wörter	Stilanker	“Editorial, low-key, obsidian texture, volumetric haze, minimal”
Negative Prompt	Ausschluss	“Bright colors, pastel, stock photo, generic lifestyle, oversaturated, CGI-smooth”

Beispiel-Formulierung (Final-Production):

Cinematic abstract backdrop, single directional warm gold light cutting through deep black void, obsidian surface texture with subtle grain, volumetric haze at 15% opacity, cool blue undertones in shadow areas, 50mm f/1.4 optical quality, shallow depth of field, lifted blacks, desaturated midtones, editorial precision, minimal composition, premium luxury aesthetic — no bright colors, no pastel, no stock photo feel, no oversaturation, no CGI-smooth surfaces.

Blueprint 2: Abstract Lightscape (Moodboard & Final)

Zweck: Bewegte oder statische Lichtstudien für Hero-Sections, Event-Loops, Motion-Snippets.

Eingabefelder:

Feld	Beschreibung	Standard-Wert
Mood	Emotionale Qualität	“Hypnotic, precise, algorithmic soul”
Licht	Lichtlogik	“Neon gold edge light, internal glow, no external ambient”
Kamera	Optische Qualität	“Anamorphic lens flare (subtle), 35mm, cinematic motion blur”
Farbwelt	Palette	“Mirrou Gold #E2FF46 as primary light, Deep Ground #050505, Digital Orchid #B886F8 as secondary accent”
Key-Wörter	Stilanker	“Sacred geometry, particle system, neural network aesthetic, fluid dynamics”
Negative Prompt	Ausschluss	“Random chaos, unsystematic, rainbow gradients, lens flare overload”

Beispiel-Formulierung (Moodboard — Exploration):

Surreal lightscape, sacred geometry formed by flowing gold particles in deep black space, subtle anamorphic lens flare, internal neon glow without external ambient light, fluid dynamics simulation aesthetic, cool precision, algorithmic pattern — exploration concept, not final asset.

Beispiel-Formulierung (Final-Production):

Cinematic lightscape, controlled gold particle stream forming precise geometric pattern, single internal light source, deep shadow #050505, subtle anamorphic flare at frame edge, 35mm cinematic quality, desaturated except gold and orchid accents, fluid but systematic motion, premium editorial — no random chaos, no rainbow gradients, no overload.

Blueprint 3: Product Hero — Hybrid (Final)

Zweck: Produkt-Hero-Shots, bei denen echte Fotografie mit AI-generiertem Hintergrund kombiniert wird.

Eingabefelder:

Feld	Beschreibung	Standard-Wert
Mood	Emotionale Qualität	“Authoritative, tactile, scientific luxury”
Licht	Lichtlogik	“Product: real studio strobe with softbox. Background: AI-extended environment matching studio light temperature”
Kamera	Optische Qualität	“Macro 100mm, f/8, focus stacking, real glass refraction”

Table 4 – continued

Feld	Beschreibung	Standard-Wert
Farbwelt	Palette	“Product color true-to-life. Background: Deep Ground + gold accent matching product highlights”
Key-Wörter	Stilanker	“Hyper-realistic, editorial product photography, seamless composite”
Negative Prompt	Ausschluss	“Plastic look, floating product without shadow, mismatched light temperature, synthetic skin”

Beispiel-Formulierung (Final-Production):

Editorial product hero, [PRODUCT NAME] on black marble surface, real studio lighting with single softbox camera-left, AI-extended background maintaining exact light temperature and shadow direction, 100mm macro, f/8, focus stacking, hyper-realistic glass and liquid textures, Mirrou Gold accent light on product edge, deep shadow #0A0A0A, subtle smoke veil at 10% opacity — no plastic look, no floating without shadow, no light mismatch, no synthetic texture.

Blueprint 4: Moodboard — Concept Exploration (NUR Moodboard)

Zweck: Interne Richtungsfindung, Kunden-Pitches, visuelle Brainstorming-Sessions. **NIE als Final verwenden.**

Eingabefelder:

Feld	Beschreibung	Standard-Wert
Mood	Emotionale Qualität	“Speculative, wide, unconstrained”
Licht	Lichtlogik	“Experimental, multiple sources allowed, no rules”
Kamera	Optische Qualität	“Variable, dreamlike, impossible optics”
Farbwelt	Palette	“Beyond brand palette —exploration of adjacent emotions”
Key-Wörter	Stilanker	“What if, speculative, mood exploration, visual research”
Negative Prompt	Ausschluss	“Final-ready, client-facing, unlabeled concept”

Beispiel-Formulierung (Moodboard — Exploration ONLY):

Speculative mood exploration for premium beauty brand, what if the product existed in a lunar environment, extreme wide angle, multiple colored light sources beyond brand palette, dreamlike gravity, visual research only — concept moodboard, not for client use, not final asset, requires human curation before any production decision.

Blueprint 5: Founder Portrait — AI-Assisted (Moodboard & Final)

Zweck: Unterstützung bei Location-Scouting, Licht-Simulation, oder als Referenz für echte Shoots.
Final-Assets sind immer echte Fotografie.

Eingabefelder:

Feld	Beschreibung	Standard-Wert
Mood	Emotionale Qualität	“Composed, present, slightly withholding”
Licht	Lichtlogik	“Single controlled gold beam 45° camera-right, minimal fill, Deep Ground background”
Kamera	Optische Qualität	“85mm portrait lens, f/2.0, real skin texture, no smoothing”
Farbwelt	Palette	“Warm gold highlight on cheekbone, cool shadow, true skin tones”
Key-Wörter	Stilanker	“Editorial portrait, magazine standard, structural wardrobe, no logos”
Negative Prompt	Ausschluss	“Beauty filter, skin smoothing, generic headshot, smiling for camera, casual lifestyle props”

Beispiel-Formulierung (Moodboard — Exploration):

Editorial portrait reference, female founder in structural black wardrobe, single gold light beam 45° right, deep shadow, 85mm f/2.0, real skin texture with pores and natural imperfection, composed expression, no smile, no beauty filter — moodboard for upcoming shoot, not final, real photography required for production.

Nutzungsregeln

- Moodboard-Blueprints** (4, teilweise 2, 5) dürfen nur intern und mit Watermark “CONCEPT — NOT FOR PUBLICATION” verwendet werden.
- Final-Blueprints** (1, 2, 3, 5) erfordern Olha-Review vor jedem Export.
- Alle Outputs** müssen AI-Ausweisung tragen (siehe Review-Checkliste Punkt 8).
- Prompt-History** wird in `mirrou-ai-prompt-log.csv` dokumentiert: Datum, Blueprint-ID, Input-Parameter, Output-Dateiname, Review-Status.
