

Abschließendes Projekt

Welcome!

25-Day Agenda*

Phase 1	Phase 2	Phase 3	Phase 4
• Einführung Projekt- und Teamplanung (Tag 1) • Eure Geschäftsidee (Tag 2) • Idee aufstellen (Tag 3 -4)	• Der Marketing Mix (Tag 5) • Der Marketing Plan (Tag 6-7)	• Kampagnen- Assetaufbau (Tag 8-12) • Kampagnenstart (Tag 13-14) • Erstellung der Präsentation (Strategie + Report) (Tag 15-22)	• Probe (Tag 23-25) • Tag des abschließenden Projektes (Tag 25)

***das ist ein geschätzter Kalender, der sich entsprechend unserer Bedürfnisse ändern könnte**

Day 5-7

Marketing Mix &

Marketing Plan

Promotion: Ai Channel Strategy (Gemini, ChatGPT or Claude)

- **Zielgruppen-Analyse:** KI identifiziert, auf welchen Plattformen (TikTok, LinkedIn, Newsletter etc.) deine Zielgruppe am aktivsten ist.
- **Content-Format-Check:** Die KI empfiehlt die passenden Formate (z. B. Kurzvideos für Instagram vs. Whitepaper für B2B-Kunden).
- **Strategie-Entwurf:** Erstellung eines kanalübergreifenden Redaktionsplans für organische und bezahlte Inhalte.
- **Budget-Allokation:** Die KI gibt Empfehlungen ab, wie du Zeit und Ressourcen am effizientesten einsetzt.

In diesem Schritt geht es darum, die KI als **Marketing-Direktor** zu nutzen, der die strategische Richtung vorgibt, **bevor** ihr in die eigentliche Erstellung der Assets (Bilder, Texte, Videos) einsteigt.

Promotion:

Ai Channel Strategy (Gemini, ChatGPT or Claude)

Sample prompt: "I'm launching a project for [product/service] aimed at [target audience]. Since I don't have a budget for paid advertising, create an organic marketing strategy for the next 4 weeks. Which 3 channels promise the fastest growth, what content formats should I use on them, and what does a sample weekly plan for these channels look like?"

Promotion: Writing blogs & save them (Claude, Zapier & Google Drive)

Google Sheet (Content Plan)

→ New entry, e.g., topic (manually)

→ Zapier/n8n/make triggers the process

→ Claude writes a blog post

→ Automatically saved as a Google Doc in Drive

- Step 1: The Content Plan (Input)
You manually enter your topic or a brief idea into a Google Sheet. This serves as the trigger for the entire process.
- Step 2: The Control Center (Zapier/n8n/make)
Zapier/n8n/make detects the new entry in the Google Sheet and automatically forwards the information to the AI.

Promotion:

Writing blogs & save them (Claude, Zapier & Google Drive)

- Step 3: AI-powered content creation (Claude)
Claude receives the assignment and writes the entire blog post based on your input.
- Step 4: Automatic saving (Output)
The result is automatically saved as a new Google Doc in your Google Drive without any action on your part.

Promotion:

Writing blogs & save them (Claude, Zapier & Google Drive)

What you'll need to prepare:

1. A structured Google Sheet for your topics.
2. A Zapier account to connect the Sheet, Claude, and Drive.
3. A destination folder in your Google Drive for the finished texts.

You can watch this [Video](#) to get started..

Promotion: Publishing (Claude, Zapier & Publer)

Google Sheets & Drive (Input & Assets) → A new entry in Google Sheets (e.g., topic or blog title) serves as a trigger → An image or video in Google Drive is saved to the appropriate folder → Zapier controls the process: It links the row from the sheet to the media file from Drive → Claude generates appropriate captions and short texts for all channels based on the input → Automatic submission to Publer, where text and image/video appear together as a draft

In this workflow, we extend the creation process to include automatic distribution to your social media channels.

You can also watch [this video](#).

Promotion: Publishing (Claude, Zapier & Publer)

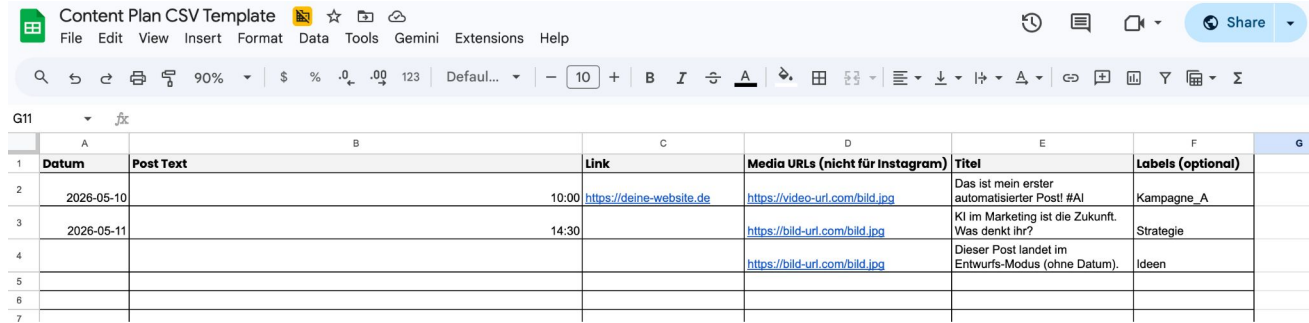

- **The Creative Process (Claude & Zapier):**
Based on your topic, Claude not only creates the blog post but also generates matching social media captions (e.g., for LinkedIn, Instagram, or Facebook).
- **Media Bridge (Google Drive):** You simply place your images or videos in a special Google Drive folder. Zapier detects the new file and automatically links it to the corresponding text from Claude.
- **Zapier** acts as a bridge once again and sends these texts directly to your publishing tool.

Promotion: Publishing (Claude, Zapier & Publer)

- **The Control Center (Publer):**
Publer automatically receives the draft text as a “Draft.”

The advantage: All you have to do is give the post a quick review, add an image (from Canva or the AI generator) if needed, and set the publication time.

Promotion: Publishing (Claude, Zapier, Google Drive & Publer)

The screenshot shows a Google Sheet titled "Content Plan CSV Template". The table has the following structure:

	A	B	C	D	E	F	G
1	Datum	Post Text	Link	Media URLs (nicht für Instagram)	Titel	Labels (optional)	
2	2026-05-10		10:00 https://deine-website.de	https://video-url.com/bild.jpg	Das ist mein erster automatisierter Post! #AI	Kampagne_A	
3	2026-05-11		14:30	https://bild-url.com/bild.jpg	KI im Marketing ist die Zukunft. Was denkt ihr?	Strategie	
4				https://bild-url.com/bild.jpg	Dieser Post landet im Entwurfs-Modus (ohne Datum).	Ideen	
5							
6							
7							

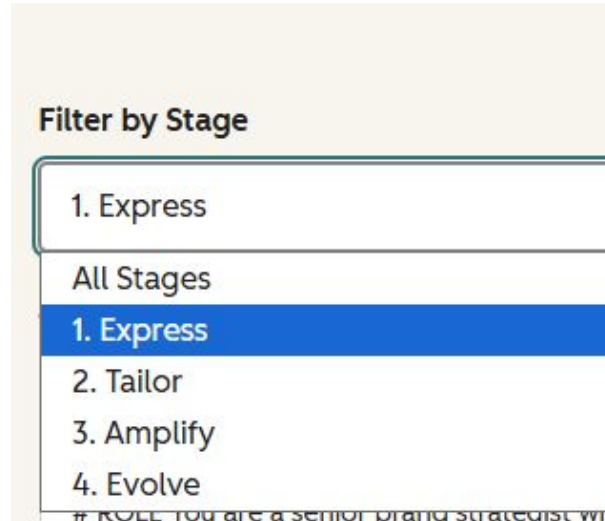

[here the template](#). **Important: Download the table as a CSV file.**

Pro tip for automation (Zapier):

Instead of filling out the CSV manually, you can set up the Zapier workflow so that every time Claude creates a caption, it is automatically written to a new row in this Google Sheet. At the end of the week, all you have to do is download the CSV once and upload it to Publer[cite: 1].

ILP (Solo-task): HubSpot AI Prompt-Bibliothek

1. Visit the [HubSpot AI Prompt-Bibliothek](#).
2. Select three categories that are relevant to your project (e.g., "Loop Marketing").
3. Test one prompt in each of your preferred AI tools (ChatGPT, Claude, or Gemini) for your group project.
4. Make a note of which prompt produced the best result and why, and share this with your team tomorrow.

ILP (Solo-task): Anthropic Zertifikat

Earn an official certificate from Anthropic (the creators of Claude) to showcase your AI expertise on your resume.

1. Sign up for the course [„AI Fluency: Framework & Foundations“](#)
2. Work through the modules at your own pace.
3. **Once you've completed the course, send me your certificate via Slack or email** and upload it to the project folder so it can be listed as a skill in the final presentation (Days 15–22).
